

Workforce Attrition & Employee Insights Da

Objective

To analyze employee attrition patterns and identify factors contributing to workforce attrition using employee demographic, work environment, and satisfaction data.

Key Findings

1. Department-wise Attrition

The Finance department recorded the highest employee attrition with **22 employees** followed by HR and Sales with **18 employees each**.

Business Impact:

This indicates potential retention challenges within the Finance department and requires further investigation into workload, job satisfaction, or career growth opportunities.

2. Overtime and Attrition

Out of 91 employees who left the organization, **80 employees were working overtime**, representing approximately **88% of total attrition cases**.

Business Impact:

Excessive overtime appears to be a major contributor to employee turnover and employee burnout.

3. Employee Satisfaction and Attrition

Approximately **85% of employees who left had satisfaction scores between 1 and 3**, indicating a strong relationship between low satisfaction and employee attrition.

Business Impact:

Improving employee engagement and workplace satisfaction may significantly reduce attrition rates.

4. Work Mode Analysis

Office-based employees recorded the highest attrition (**38 employees**) compared to Remote (**25 employees**) employees.

Business Impact:

Flexible work arrangements may positively influence employee retention and workforce stability.

Recommendations

1. Monitor and reduce excessive overtime across departments.
2. Conduct regular employee satisfaction surveys.
3. Investigate retention challenges within the Finance department.
4. Improve employee engagement and recognition programs.
5. Explore hybrid and flexible work policies to improve retention.

Conclusion

The analysis indicates that overtime, low employee satisfaction, and departmental differences are strongly associated with employee attrition. Addressing these areas may

employee retention and overall organizational performance.
